

- Design the webpage as per the attached design.
- It's a blog page, where there are multiple blogs are being shown in a grid view and in paginated form.
- It has a header that would be shown even if you scroll down.
- It has a footer that would have some links which will open in a new tab.
- Sample images, title, description and dates to be used.
- The webpage needs to be responsive for smaller screens.
- Show your skills while doing responsiveness design. Responsive designs aren't provided.

Code to be submitted in a zipped folder along with all the files and instructions.
